***WILDFIRE ACTIVITY STATISTICS***

**HAROLD R. WALT**

**Director**

## WILDFIRE ACTIVITY STATISTICS

### FOREWORD

The California Public Resources Code directs the State Board of Forestry to designate state and privately-owned forest, watershed, and rangeland as "State Responsibility Area." The department's fire protection mission is to protect natural resources on those lands from damages by wildfire. Land not designated as State Responsibility Area is the protection responsibility of federal or local agencies.

The Department of Forestry and Fire Protection provides direct protection for most State Responsibility Area. The remainder is protected by several agencies and counties under contract with the state. The Department of Forestry and Fire Protection also contracts to provide wildland fire protection on certain federal lands, and also provides contracted life and property protection for numerous local governments.

This annual report is primarily a statistical record of fires and damages on State Responsibility Area, and on other areas which the Department of Forestry and Fire Protection protects under contract.

The Emergency Activity Reporting System became effective July 1, 1989. Fire data is entered into the computer at the fire station level, then forwarded to the ranger unit headquarters via a modem and phone lines for storage in the ranger unit database. A copy of it is then forwarded to Sacramento Headquarters for storage in the state database.

## **GLOSSARY**

**CDF** = California Department of Forestry and Fire Protection

**CONTRACT COUNTY** = Counties that protect State Responsibility Area with their fire departments. For providing that protection the counties receive payment from the state, and CDF support and reinforcement as needed for fire suppression. There are six contract counties: Kern, Los Angeles, Marin, Orange, Santa Barbara, and Ventura.

**DIRECT PROTECTION** = The area protected by an agency with its own fire protection force.

**FEDERAL ZONE** = The direct protection area Of U.S. Forest Service, Bureau of Land Management, National Park Service, Department of Defense, and Bureau of Indian Affairs. State Responsibility Area within federal zone is protected by federal agencies. For providing that protection the federal agencies receive payment from the state.

**LOCAL ZONE** = Area in which there is no State Responsibility Area. In general, this is valley floor and desert land. Fire protection in local zone is provided by local government agencies; such as, cities, counties, and fire districts, or by the CDF under contract to local governments.

**LOCAL RESPONSIBILITY FIRE** = A fire that did not burn or threaten to burn natural resources.

**STATE RESPONSIBILITY AREA (SRA)** = The area designated by the State Board of Forestry on which the state assumes financial responsibility for protecting natural resources from damage by fire.

**STATE RESPONSIBILITY WILDFIRE** = A fire in SRA which burns or threatens to burn natural resources.

**STATE ZONE** = State Responsibility Area and intermingled islands of federal land protected by the CDF and contract counties. Most federal land in state zone is protected by the CDF under contracts with federal agencies.

**WILDFIRE** = Contraction of "wildland fire." This term is used by wildland fire protection agencies to indicate a vegetation fire. Wildfire generally replaces such terms as forest fire, brush fire, range fire, and grass fire.

# **WILDFIRE STATISTICS**

**ALL AGENCIES**

## 1990 FIRE SEASON SUMMARY

1990, in the State of California was characterized by one word... Drought! Contributing factors for an active fire season were high temperatures and low rainfall. The entire state continued to experience a precipitation deficit. This was most pronounced on the central coast where the yearly percent of average rainfall totaled around 20% at years end.

Late June, Southern California experienced record temperatures in the 95-115 range. Already in progress was the Bedford fire on the Cleveland National Forest, which was burning about 490 acres and 20 homes. Shortly thereafter, someone opened the oven door when numerous arson fires plagued Southern California. With the depletion of fire equipment and personnel, property damage and destruction of wildlands were increased.

The following fires with high structure loss resulted:

|               |                   |             |                |
|---------------|-------------------|-------------|----------------|
| Bedford       | Riverside         | 490 acres   | 20 structures  |
| Paint         | Santa Barbara Co. | 4,900 acres | 641 structures |
| Carbon Canyon | Orange Co.        | 6,640 acres | 14 structures  |
| Morettis      | San Diego         | 3,590 acres | 2 structures   |
| Glendale      | Los Angeles Co.   | 75 acres    | 50 structures  |

July and August continued the high temperatures and low moisture content in 10-100 and 1000 hour fuels. Extensive thunderstorm activity commenced during these months with the most intense period being August 5-20, 1990. Statewide fire activity during this time resulted in Sacramento Multi-Agency Command (SACMAC) activation. Firefighting resources were drawdown to the minimum due to the major CDF fires in Region II and in assisting the U.S. Forest Service in their numerous fires. Similar to the disastrous 1985 fire season, National Guard and Office of Emergency Services were heavily utilized. Out-of-state firefighting personnel were brought in to aid CDF and USFS, especially on the Campbell Complex and the Yosemite National Park fires, A-Rock and Steamboat. The following fires resulted in heavy property and acreage loss:

|                  |               |               |               |
|------------------|---------------|---------------|---------------|
| A-Rock           | Mariposa Co.  | 12,136 acres  | 66 structures |
| Finley Lake      | Tehama        | 18,000 acres  | 27 structures |
| Campbell Complex | Lassen/Shasta | 120,000 acres | 17 structures |

The remainder of fire season, despite the below average rainfall figures, there were no additional large fire scenarios. Fire season 1990 came to a close January, 1991.

## 1990 LARGE DAMAGING FIRE SUMMARY

The following list includes fires 300 acres or larger that burned at least:

30 acres of timber, or 300 acres of brush or 1500 acres of woodland and/or grass, or on which 3000 CDF person hours were expended.

The list is primarily CDF fires, but also includes some other agency fires on which CDF forces were significantly involved. The other agency fires shown are not a complete list of any other agencies large fires.

Abbreviations used in this list are:

|                         |                                                                                                                                                                     |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| DATE START              | = Date fire started.                                                                                                                                                |
| DATE CONT.              | = Date fire contained.                                                                                                                                              |
| ORIGIN D.P.A.           | = The agency on whose direct protection area (D.P.A) the fire started.                                                                                              |
| ACRES BURNED            | = Acres burned in direct protection area of CDF, other agencies, and total area burned.                                                                             |
| VEG. TYPE               | = Type of vegetation on area burned.                                                                                                                                |
|                         | T = Timber                                                                                                                                                          |
|                         | B = Brush                                                                                                                                                           |
|                         | W = Woodland                                                                                                                                                        |
|                         | G = Grass                                                                                                                                                           |
|                         | AP = Agricultural Products                                                                                                                                          |
| DWELLINGS OR STRUCTURES | = Number of dwellings or structures destroyed or damaged. Dwellings and structures destroyed or damaged by fires not included on this list have not been tabulated. |

JULY - NOVEMBER

**POSITIVE STRIKE\***

**NEGATIVE STRIKE\*\***

\*Positive Lightning Strike - travels from ground to cloud. A Positive strike is stronger and hits outside the rainfall area which is the reason it causes more lightning fires.

\*\*Negative Lightning Strike - travels from cloud to ground.
